

IMPORTANT – CLEANING INSTRUCTIONS FOR BLACK FREESTANDING BATHS

Dear Customer,

The coating on this product is finished to a high standard. To clean the product surface properly, use a soft sponge/cloth and warm water **ONLY**. To avoid limescale/watermarks from building up, it is advisable to wipe the surface dry each time it is used.

Using the wrong chemical-based cleaner can permanently damage them. Not only will it break down the coating and cause discolouration, but it will enable scratches to occur more easily. Damage to the surface caused by improper cleaning/maintenance will not be covered under guarantee.

On no account should any bathroom cleaner be used on this product as these can contain acids/suphates that are aggressive/corrosive on finished surfaces.

Yours sincerely,

Atti Bathrooms
